Generations	Percentage
2	59.37%
4	83.49%
6	93.29%
8	97.28%
10	98.89%
12	99.55%
14	99.82%
16	99.93%
18	99.97%
20	99.99%
22	100.00%
24	100.00%

Refine your results with paper trail input

If traditional genealogical records indicate that a common ancestor between you and your match could not have lived in a certain number of past generations, your TiP results can be refined. Note, if you are not sure of this information, you should not change the value of "1" below.

John Collyer and **Harold Colyer c/o richard curtis** did not share a common ancestor in the last generation(s).

Markers Display

Since each marker has a different mutation rate, identical Genetic Distances will not necessarily yield the same probabilities. In other words, even though **Harold Colyer c/o richard curtis** has a Genetic Distance of 3 from **John Collyer**, someone else with the same Genetic Distance may have different probabilities, because the distance of 3 was prompted by mutations in different markers, with different mutation rates.
